

### PVC Stair Tread Protector - Yellow

#### Description

Rigid protective covers used to protect both commercial and domestic stair installations.

The unique design provides a high degree of protective cover, excellent grip, impact and scuff resistance to either bull-nosed timber treads in domestic house building or square fronted concrete treads in commercial buildings.

The reusable stairtread protectors offer a cost-effective alternative to repairs or replacement of finished areas, reducing the overall cost of the build.

Manufactured from self-extinguishing PVC.

#### Stairtread Fixing Guidelines:

- Protectors should be securely fixed to timber treads using appropriate screws and we recommend that fixings be inserted 30mm from the back edge with three fixings per 750mm length
- Alternatively, for concrete treads, protectors should be securely fixed using Toffee (Rubber Resin) Tape. All surfaces should be clean, dust and chemical free, prior to application. The performance of adhesive tapes can be lessened in cold temperatures
- The above are recommendations only and, as site conditions vary, the user should ensure the treads are fixed adequately and that regular checks be made by a competent person on site
- Use in conjunction with other Ockwells products, such as MegaShield or Hard Surface Film for full tread protection

Description	Dimensions
Ockwells Stair Tread Protector - Yellow	750mm Wide x 210mm Deep

Bespoke sizes available on request, subject to minimum order quantities

**Version Date: 03/06/25**

These properties are the Manufacturers' typical values based on the average of several tests. As the installation and handling of this product is beyond our control the user must ensure that the product is suitable for the application.
